IPOD Media Center Integration

"I've used Pacific Mediatek for several projects and have found them very professional and reliable. They did a great job in providing me with options and solutions for my projects. I would not hesitate to call them again."

Scott C., Carlsbad, CA

"I was doubtful at first that you would be able to make some sense of the many components in my entertainment center. However, you guys came to my home, installed and programmed all on the same day without any mess. Thank you for your work - I love my new setup!"

Pauline, Vista, CA

"Being a client-based, commercial editing facility, our requirements are both highly technical and aesthetic. Pacific Mediatek met our demands beautifully, with same-day service and no down-time."

HOME AUTOMATION = ENERGY SAVINGS

and that equals LOWER UTILITY BILLS!

Home Automation • Lighting Control
Audio & Video • Home Theater
Remote Monitoring

HOME AUTOMATION

SAVE ENERGY THROUGH AUTOMATION:

- Temperature and window coverings in your home automatically adjust to changing outdoor conditions.
- Never walk into a dark house again: Turn on selected lights inside your home, from the safety of your car.
- Sprinkler systems skip a watering schedule on a rainy day.
- Bathroom fan automatically stops after a preset delay, avoiding potentially hours of wasted energy.

Automation will make your life easier. Energy savings can be significant, as devices are on only when needed. Lights, temperature, and even irrigation, can all be conveniently automated to simplify your life and save wasted energy.

HOME THEATER

Whether you simply need a flat panel TV installed or would like to build your own custom home theater room, Pacific Mediatek specializes in the design and integration of your audio and video equipment into your living space. We have solutions for every budget.

AUDIO & VIDEO CALIBRATION

Speaker locations, room dimensions and furnishings will all impact sound quality. Video monitors and TV's are set for store viewing, which typically push color to a higher temperature... this will reduce the life of your equipment. Our ISF and HAA trained technicians will improve both sound AND video quality, exceeding your expectations.

MULTI-ROOM AUDIO & VIDEO

Enjoy outdoor and/or multi-room audio and video, adding a whole new dimension to your home.

REMOTE MONITORING

Remotely control key functions of your home. Lights, temperature and video, just to name a few, can all be monitored via the internet or a mobile phone.

LIGHTING CONTROL

Intricate lighting "moods" can be preset for any desired ambiance, or simply to save energy at varying times of the day and evening.

Control your outdoor lights with an easy-to-use timer that calculates the exact moment of each sunset: No seasonal change is needed.

Any or all lights can be turned off from a single button, avoiding the wasted energy of being accidentally left on during the daytime.
